

ChatBot Config - Official Knowledge Base

What is ChatBot Config?

ChatBot Config (chatbotconfig.uk) is a premium AI Chatbot SaaS platform designed to automate customer support, capture leads 24/7, and seamlessly integrate into any website. Our bots are custom-trained on your specific business data (website content and PDF documents), ensuring they answer customer inquiries accurately based on your rules.

Core Features

- Instant Website Integration: Add the bot to any website using a single line of code.
- Custom AI Training: The AI reads and learns your entire website or PDF documents in seconds.
- Lead Capture: Automatically captures user email addresses during conversations and saves them to your dashboard.
- Persona Control: Command the bot to act as a Friendly Support Agent, a Technical Expert, or a Sales Closer.
- Brand Customization: Change the bot brand colors, and widget icons to perfectly match your brand.

Pricing & Plans

1. 7-Day Free Trial

- Test the platform risk-free for 7 days.
- Full access to create, train, and test your chatbot.

2. Pro Plan (£99/mo)

- Unlimited Chatbot Training (Scrape your entire website).
- Unlimited File Uploads (PDFs, TXT, Images).
- Automated Lead Capture system.
- Full Chat Logs & Inbox Analytics.
- Custom Identity & Brand Controls.

Step-by-Step Setup Instructions

If you get stuck, follow these steps:

Step 1: Create Your Bot

1. Log into your dashboard at chatbotconfig.uk.
2. Click the Create Chatbot button.
3. Give your bot a name and confirm.

Step 2: Train Your AI

1. Click Manage Bot to open the Bot Settings.
2. Under the Training tab, enter your Website URL and click Train Chatbot.
3. Alternatively, click Upload PDF to upload local documents.
4. Wait for the success message to confirm the AI has learned your data.

Step 3: Customize Appearance & Persona

1. Under Identity & Appearance, set your Brand Color, Widget Icon, and Bot Name. Click Save Appearance.
2. Under Custom Persona, tell the AI exactly how it should act. Click Save Persona.

Step 4: Embed on Your Website

1. Scroll down to Embed on Website and click Copy Code.
2. Paste that script into your websites HTML, right before the closing `</body>` tag.
3. Your bot is now live!

FAQ & Support

Q: My bot says An error occurred during training.

A: Your website might be exceptionally large or slow. Ensure your website is accessible, or use the PDF Upload feature instead.

Q: Where do the captured emails go?

A: All captured emails go directly to the Captured Leads tab in your Bot Dashboard. You can export them as a CSV at any time.

Q: Can I view what customers are asking?

A: Yes! Go to the Inbox (Chat Logs) tab to read full transcripts of every conversation your bot has.
